The diagram illustrates the structure of the Urdu word 'پاکستان' (Pakistan). It is broken down into syllables, each represented by a box containing a vowel sign and a consonant. The syllables are classified into three categories: Non-declinable, declinable, and passed.

**Non-declinable:** This category includes the initial syllable 'پ' (P) and the final syllable 'ن' (N). These syllables are not subject to declension.

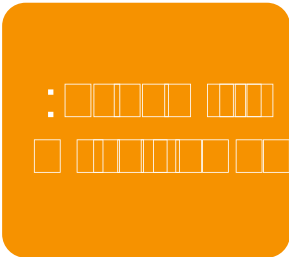

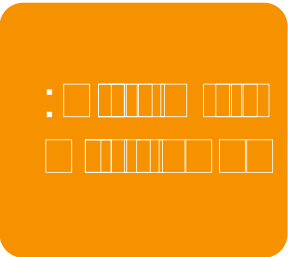

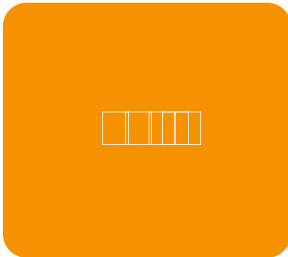

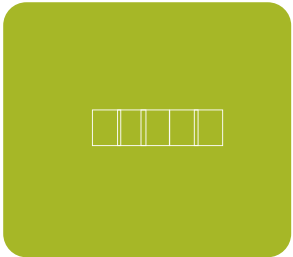

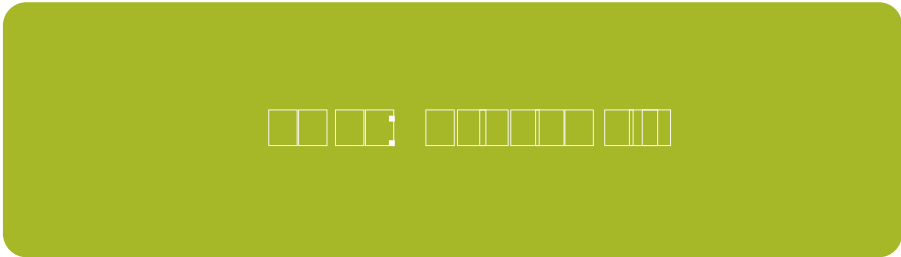

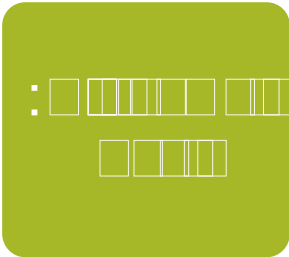

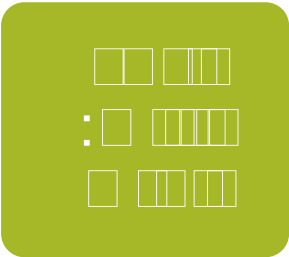

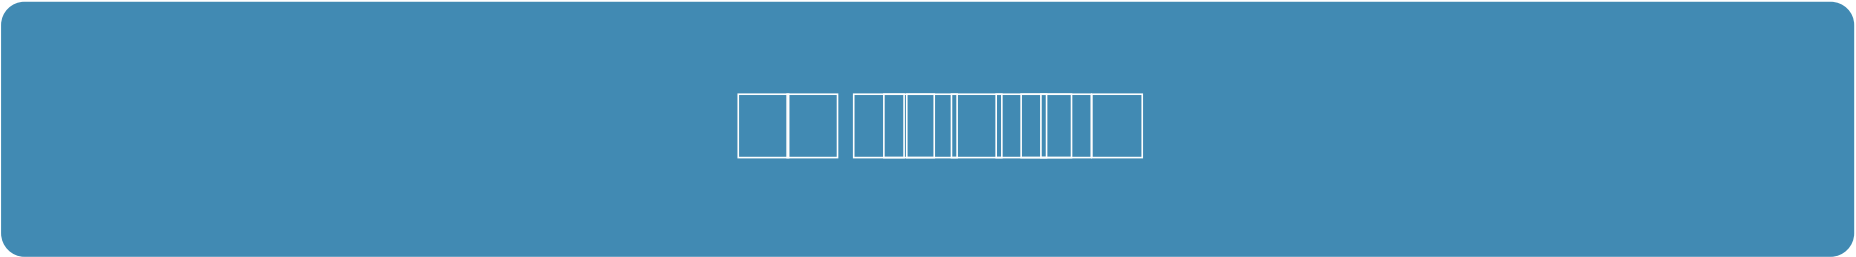

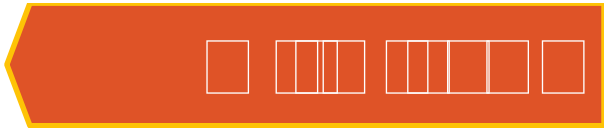

**declinable:** This category includes the syllables 'ا' (A), 'ک' (K), 'س' (S), 'ت' (T), and 'ا' (A). These syllables are subject to declension.

**Divided Broken down:** This category includes the syllables 'س' (S), 'ت' (T), and 'ا' (A). These syllables are divided into two parts, each represented by a box containing a vowel sign and a consonant.

**passed:** This category includes the syllables 'ا' (A), 'ک' (K), 'س' (S), 'ت' (T), and 'ا' (A). These syllables are passed over and do not undergo declension.

- 

let us discuss

سُبْحَانَكَ اللَّهُمَّ وَبِحَمْدِكَ  
أَشْهَدُ أَنْ لَا إِلَهَ إِلَّا أَنْتَ  
أَسْتَغْفِرُكَ وَأَتُوبُ إِلَيْكَ
